No. 1247-SD-C

FINDINGS OF FACT, CONCLUSIONS
OF LAW, AND INTERLOCUTORY
JUDGMENT No. 36, WARM SPRINGS
CREEK SUB-WATERSHED.

FINDINGS OF FACT

I

20 Warm Springs Creek, a tributary of Murrieta Creek, rises
21 in Sections nine (9) and fifteen (15), Township six (6) South,
22 Range one (1) West, S.B.M., and flows in a generally southwesterly
23 direction through areas known as Diamond and Domenigoni Valleys.
24 It leaves Domenigoni Valley at a point near the Southeast (SE)
25 corner of the Southwest Quarter (SW 1/4) of the Southwest Quarter
26 (SW 1/4) of Section nine (9), Township six (6) South, Range two
27 West, S.B.M. From that point Warm Springs Creek proceeds in a
28 generally south and westerly direction throughout a rather deep
29 incised valley to its point of confluence with Murrieta Creek in
30 Section twenty-four (24), Township seven (7) South, Range three
31 West, S.B.M. The course and location of Warm Springs Creek are
32 delineated upon U. S. Exhibits 274, and 208-F, made a part here

1847

2

1 by reference.

2 II

3 Warm Springs Creek is an intermittent stream both as to
4 time and place, flowing only during and immediately after periods
5 of heavy precipitation and run-off. There is no evidence as to the
6 amount or rate of flow of Warm Springs Creek, or as to the average,
7 maximum, minimum, normal or anticipated flow of Warm Springs Creek,
8 and the Court expressly makes no findings thereon because of such
9 lack of evidence.

10 III

11 Warm Springs Creek has its source in and flows through
12 Diamond and Domenigoni Valleys. These valleys comprise a ground
13 water basin filled with sedimentary material described herein as
14 younger alluvium. The extent and location of said ground water
15 basin is delineated upon United States Exhibits 274 and 208-F,
16 made a part hereof by reference.

17 The ground water basin referred to herein is part of a
18 continuous body of younger alluvium which extends from within the
19 San Jacinto River watershed in Sections 33 and 34, T5S, R 1 W,
20 and Section 3, T6S, R 1 W, across the watershed divide in Sections
21 3 and 4, T6S, R 1 W, and Sections 32 and 33, T 6 S, R 2 W, S.B.M.
22 into the Santa Margarita River watershed; thence continuing in a
23 generally westerly and southwesterly direction as delineated on
24 United States Exhibits 274 and 208-F; thence crossing the water-
25 shed divide out of the Santa Margarita River watershed and into
26 the San Jacinto River watershed in Sections 8 and 9, T6S, R 2 W,
27 S.B.M.

28 IV

29 The southerly limit of said ground water basin is in the
30 general vicinity of the south line of Section 9, T 6 S, R 2 W,
31 S.B.M. At that point the said ground water basin is enclosed by
32 a lip of basement complex material rising to elevation 1400',

1 which lip prevents the movement of ground water from said basin
2 southwesterly into the remainder of Warm Springs Creek sub-
3 watershed and the Santa Margarita River watershed, excepting at
4 such times as the ground waters north of said lip exist at or above
5 elevation 1400'.

6 The presence of said basement complex lip is a barrier
7 to the movement of all ground waters within said basin below
8 elevation 1400', and causes such ground waters to move out of
9 said basin and out of the Santa Margarita River watershed and into
10 Menifee Valley of the San Jacinto River watershed in Section 8,
11 T 6 S, R 2 W, S.B.M.

12 V

13 Due to the relatively low permeability of the alluvium
14 underlying Warm Springs Creek at and near said basement complex
15 lip, the quantities of ground water which can percolate through
16 it are small. At such times as the ground water level in said
17 basin is above elevation 1400', the larger proportion of such
18 ground waters move westerly out of the Santa Margarita River
19 watershed and into Menifee Valley of the San Jacinto River water-
20 shed; and the smaller proportion of such ground waters move over
21 the basement complex lip and on down Warm Springs Creek. The
22 ground waters which do move down Warm Springs Creek downstream from
23 the south line of Section 9, T6S, R 2 W, S.B.M. are consumed
24 almost in their entirety by evaporation and transpiration losses
25 within a relatively short distance downstream.

26 VI

27 United States Exhibit 208-F, incorporated herein by
28 reference delineates the sub-watershed of Warm Springs Creek,
29 and its relation to the Murrieta-Temecula Ground Water Area,
30 subject of Interlocutory Judgment 30 herein. On said map are
31 delineated the geologic formations found in said sub-watershed,
32 including the areas of younger alluvium that comprise Diamond and

FALLBROOK, CALIF.
RANDOLPH 8-1184

1840
4

1 Domenigoni Basin. There are also delineated thereon the exterior
2 boundaries of all land ownerships in said sub-watershed, indicated
3 by parcel numbers, as said land ownerships appeared at the date
4 of recordation of Notice of Lis Pendens, April 9, 1958, in Book
5 2252, page 17, Official Records of Riverside County.

6 Attached hereto, marked Exhibit A, and made a part
7 hereof by reference, is a tabulation of the land ownerships
8 delineated upon United States Exhibit 208-F, which tabulation
9 indicates property descriptions and apparent ownerships, and in
10 addition thereto may contain factual statements concerning the
11 following matters:

- 12 1. Wells.
- 13 2. Surface diversions.
- 14 3. Gross acreages.
- 15 4. Irrigated acreages.
- 16 5. Irrigable acreages.
- 17 6. Water duty.

18 The factual statements contained in said Exhibit which
19 pertain to well and surface diversions are true as of the date of
20 this Interlocutory judgment. The factual statements as to apparent
21 ownerships are set forth for convenience only, and are not neces-
22 sarily correct and are not intended to be determinative or probative
23 on the issue of ownership of any real property described in said
24 Exhibit.

25 The factual statements contained in said exhibits which
26 pertain to gross acreages, irrigated acreages, irrigable acreages
27 and water duty almost without exception are based on evidence
28 introduced in this case by the United States of America with an
29 express assurance by its counsel that apportionment was not being
30 sought at this stage of the litigation; because of this fact and
31 the fact that this Court is not at this time making any order
32 apportioning or regulating the use of the waters involved herein,

1850
5

1 said facts pertaining to gross acreages, irrigated acreages,
 2 irrigable acreages and water duty are not material to any issue
 3 decided by Interlocutory Judgment No. 36 entered herewith; that
 4 in the exercise of this Court's continuing jurisdiction in this
 5 cause said facts may well be material to an issue presented to
 6 this Court in the future; therefore, this Court finds that such
 7 factual statements which are contained in said Exhibit A which
 8 pertain to gross acreages, irrigated acreages, irrigable acreages
 9 and water duty are supported by the evidence in this case and
 10 such factual statements shall be prima facie evidence as to gross
 11 acreages, irrigated acreages, irrigable acreages and water duty
 12 in any subsequent proceeding before this Court in this cause;
 13 as used herein prima facie evidence is that which suffices for
 14 the proof of a particular fact until contradicted or overcome by
 15 other evidence.

VII

16
 17 Certain defendants are presently extracting waters from
 18 the ground water basins of Diamond and Domenigoni Valleys and are
 19 using such waters for domestic and agricultural purposes upon
 20 their lands.

21 All of the uses to which such defendants are putting
 22 water upon their lands, and all of the methods of use of water by
 23 defendants are reasonable and beneficial and within the limitations
 24 imposed upon the use of water by the Constitution and Statutes of
 25 the State of California. Under present conditions it would be
 26 wasteful and unreasonable and contrary to the Constitution and
 27 Statutes of the State of California to require that the water
 28 level in Diamond and Domenigoni Basins be maintained at elevation
 29 1400' or above, and any such requirement would interfere with the
 30 reasonable use of the said ground waters by overlying landowners.

VIII

31
 32 That the issue of apportionment as to the quantity of

1 the ground waters of Diamond or Domenigoni basins to which any
2 overlying landowners may be entitled has not been reached at
3 this stage in this case, and the Court has taken no evidence
4 directed to this issue. This issue is left open, is not decided
5 herein and shall be litigated by this Court if and when in the
6 future it becomes necessary to do so.

7 IX

8 That because of the fact that the movement of ground
9 waters within Diamond and Domenigoni Basins is westerly and out
10 of the Santa Margarita River watershed and into the San Jacinto
11 watershed it would be impossible for this Court at this time to
12 make an allocation of said waters among all owners of lands over-
13 lying said basins in that those persons who own lands which over-
14 lie said basin within the San Jacinto watershed are not parties
15 to this suit.

16 X

17 The course of Warm Springs Creek downstream from the
18 south line of Section 9, T 6 S, R 2W, S.B.M. to the boundary of
19 the Murrieta-Temecula Ground Water area which is more particularly
20 described in Interlocutory Judgment No. 30 herein, is delineated
21 upon United States Exhibit No. 208-F, made a part hereof by
22 reference. Throughout most of this area there are areas of
23 younger alluvium, the location and extent of which is delineated
24 upon United States Exhibit 208-F. These younger alluvial deposits
25 are water-bearing when saturated, and rest upon and are confined
26 laterally by deposits of consolidated rock described on said
27 Exhibit 208-F as "basement complex" or "basement complex (weathered)".
28 These deposits of consolidated rock are essentially non-water-
29 bearing, and the materials of which they are composed are con-
30 siderably more compacted and less permeable than the alluvial
31 deposits. As a result thereof, any ground waters found within
32 said alluvial deposits do not move laterally or vertically into

1 the consolidated rocks, but on the contrary move down the
2 hydraulic gradient through the younger alluvial deposits.

3 XI

4 At such times as there is surface flow of Warm Springs
5 Creek, the location of such surface flow fluctuates considerably
6 and shifts its position upon the younger alluvial deposits from
7 season to season and even within each rainy season.

8 XII

9 The deposits of consolidated rock on either side of the
10 younger alluvial deposits and upon which said younger alluvial
11 deposits rest, impede any ground waters within said younger
12 alluvial deposits from moving out of the younger alluvial deposits
13 and into the consolidated rock, and do in fact act in the same
14 manner as substantially impermeable bed and banks of a surface
15 stream. The ground waters within said younger alluvial deposits
16 are in fact in a known and defined channel and do constitute the
17 underground stream of Warm Springs Creek. The ground waters, if
18 any, contained within said alluvial deposits are a part of the
19 waters of the Santa Margarita River system.

20 XIII

21 Attached hereto marked Exhibit B, and incorporated
22 herein, are descriptions of the smallest tract of land held
23 under one chain of title, a portion of which abuts upon Warm
24 Springs Creek as herein described.

25 XIV

26 The ground waters, if any, contained within areas of
27 basement complex, basement complex (weathered), volcanic rock
28 or older continental deposits as delineated on Exhibit 208-F
29 within the sub-watershed of Warm Springs Creek are the subject
30 of Interlocutory Judgment 36-A in these proceedings.

CONCLUSIONS OF LAW

I

All surface waters upon lands depicted on United States Exhibits 274 and 208-F within the sub-watershed of Warm Springs Creek are a part of the Santa Margarita River and are subject to the continuing jurisdiction of this Court.

II

All ground waters found within areas of younger alluvium downstream from the south line of Section 9, T 6 S, R 2 W, S.B.M. as such areas of younger alluvium are depicted upon United States Exhibit 274 and 208-F, are a part of the Santa Margarita River system and are subject to the continuing jurisdiction of this Court.

III

At the present time, and so long as the ground waters contained within areas of younger alluvium immediately north of the south line of Section 9, T 6 S, R 2 W, S.B.M. remain below elevation 1400', all ground waters contained within areas of younger alluvium north of said line, as the same are depicted upon United States Exhibits 274 and 208-F, are not a part of the Santa Margarita River system and do not contribute to the waters of said river system downstream from said south line of Section 9, T 6 S, R 2 W, S.B.M.

IV

That it would be wasteful and unreasonable, and contrary to the provisions of Article XIV, Section 3, California Constitution, to require the maintenance of a water level in Diamond and Domenigoni Valleys at elevation 1400' or above for the purpose of supporting a ground water movement southwesterly past the south line of Section 9, T 6 S, R 2 W, S.B.M. and down Warm Springs Creek, and for that reason the extractions of ground water from within Diamond and Domenigoni Basins will not be

1 presently regulated or restricted in these proceedings for the
2 purpose of maintaining such a flow. However, the Court will
3 retain continuing jurisdiction of this cause for the purpose
4 of reviewing or reconsidering possible control of future ground
5 water extractions should substantial changes in circumstances so
6 require.

7 V

8 Those lands described in Exhibit A attached hereto and
9 incorporated herein which in whole or in part overlie Diamond
10 and Domenigoni Basins north of the south line of Section 9,
11 T 6 S, R 2 W, S.B.M., as the same are delineated upon United States
12 Exhibits 274 and 208-F have correlative overlying rights to the
13 use of the ground waters contained within the younger alluvial
14 deposits of said basins.

15 VI

16 All lands described in Exhibit B attached hereto and
17 incorporated herein have a correlative riparian right to the use
18 of the waters of Warm Springs Creek as the same have been
19 defined herein.

20 VII

21 That at the present status of this case the issue of
22 apportionment or the quantity of proportion of waters to which any
23 lands are entitled has not been presented and this Court has taken
24 no evidence directed to establishing whether any water uses pursuant
25 to riparian or overlying rights are reasonable or unreasonable as to
26 amount of water used in the light of the correlative rights which may
27 exist as to such waters, and this issue is left open, is not decided
28 herein and shall be litigated by this Court if and when in the fu-
29 ture it becomes necessary to do so; in the exercise of this contin-
30 uing jurisdiction this Court will judge and pass upon the exercise
31 of such riparian or overlying right based on the facts as they
32 may then appear and pursuant to California law.

INTERLOCUTORY JUDGMENT

1
2 IT IS HEREBY ORDERED, ADJUDGED AND DECREED that all
3 surface waters which flow over or upon the lands depicted on
4 United States Exhibits 274 and 208-F within the Santa Margarita
5 River watershed, which exhibits are incorporated herein by
6 reference, are a part of the Santa Margarita River and subject
7 to the continuing jurisdiction of this Court.

8 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all
9 ground waters contained within areas of younger alluvium down-
10 stream from the south line of Section 9, T 6 S, R 2 W, S.B.M.,
11 as such areas of younger alluvium are depicted upon United States
12 Exhibits 274 and 208-F, which Exhibits are incorporated herein
13 by reference, are a part of the Santa Margarita River and subject
14 to the continuing jurisdiction of this Court.

15 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all
16 ground waters contained in areas of younger alluvium located
17 north of the south line of Section 9, T 6 S, R 2 W, S.B.M.,
18 as such areas of younger alluvium are depicted on United States
19 Exhibits 274 and 208-F, incorporated herein by reference are not
20 a part of the waters of the Santa Margarita River system at
21 this date, but this Court retains continuing jurisdiction of this
22 cause to further consider such question at such time as the
23 elevation of such ground waters may change.

24 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all
25 lands described in Exhibit A attached hereto and incorporated
26 herein, which overlie in whole or in part younger alluvial deposits
27 of Diamond and Domenigoni Basins as the same are delineated upon
28 United States Exhibits 274 and 208-F, incorporated herein, have
29 correlative overlying rights to the use of the ground waters con-
30 tained in the younger alluvial deposits on said lands.

31 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all
32 lands described on Exhibit B attached hereto and incorporated

herein have correlative riparian rights to the use of the waters of Warm Springs Creek.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the correlative overlying rights and correlative riparian rights described in this Interlocutory Judgment shall be and are subject to the continuing jurisdiction of this Court.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the issue of apportionment has not been presented and this Court has taken no evidence directed to establishing whether the use of any waters herein adjudged to be subject to the continuing jurisdiction of this Court are reasonable or unreasonable as to amount of water used in the light of correlative rights which may exist as to such waters and this issue is left open, is not decided herein and shall be litigated by this Court if and when in the future it becomes necessary to do so.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that this Interlocutory Judgment is not appealable, is not final and shall not be operative until made a part of the final judgment, and this Court expressly reserves jurisdiction to modify or vacate it, either upon its own motion or upon motion of any party to this proceeding until such time as final judgment in this case is entered.
