UNITED STATES OF AMERICA,  
Plaintiff,  
vs.  
FALLBROOK PUBLIC UTILITY  
DISTRICT, et al.,  
Defendants.

No. 1247-SD-C

FINDINGS OF FACT, CONCLUSIONS  
OF LAW AND INTERLOCUTORY  
JUDGMENT NO. 40 PERTAINING  
TO THE AGUANGA GROUND WATER  
AREA.

FINDINGS OF FACT

1.

That the Aguanga Ground Water Area is comprised of younger and older alluvial deposits. The exterior boundaries of said ground water area are graphically set forth on United States Exhibit 277B which Exhibit is incorporated herein and made a part hereof by reference, and specifically described in Exhibit A attached hereto. That said exterior boundaries of the Aguanga Ground Water Area have to a certain degree for practical purposes been arbitrarily fixed to conform to lines established by legal subdivisions or to existing physical conditions such as roads. That the areas of younger and older alluvial deposits which comprise said Aguanga Ground Water Area can be determined by reference to U. S. Exh. 275 incorporated herein by reference.

2.

That there are two principal creeks or streams which flow over and upon the lands which comprise the Aguanga Ground Water Area: Wilson Creek enters the ground water area in Section 10, Township 8 South, Range 1 East, and flows over and upon the younger alluvial deposits which comprise Wilson Valley. It then flows across the Southwest Quarter ( $SW\frac{1}{4}$ ) of Section 9, Township 8 South, Range 1 East, into Lancaster Valley. Wilson Creek flows across Lancaster Valley as depicted on U. S. Exhibit 275, proceeds across Section 7, Township 8 South, Range 1 East, then over Section 12, Township 8 South, Range 1 West, and over projected Section 11, Township 8 South, Range 1 West into Vail Lake.

Temecula Creek enters the Aguanga Ground Water Area in Section 34, Township 8 South, Range 1 East, flows over and upon the younger alluvial deposits which comprise Aguanga Valley in Sections 34, 33, 28 and 29, Township 8 South, Range 1 East. After proceeding across Aguanga Valley, Temecula Creek flows over a thin and constricted area of younger alluvial deposits in Sections 29 and 30, Township 8 South, Range 1 East and enters Rader Valley and then proceeds over a constricted area of younger alluvial deposits in the southwest quarter ( $SW\frac{1}{4}$ ) of Section 19, Township 8 South, Range 1 East and into Section 24 Township 8 South, Range 1 West where it enters Nigger Valley. Temecula Creek then flows in a general northwesterly direction over the younger alluvial deposits in Nigger Valley in Sections 24 and 13 and Projected Sections 14 and 15 all in Township 8 South, Range 1 West to its point of confluence with Vail Lake.

3.

That the younger alluvial deposits within the Aguanga Ground Water Area rest upon and are confined laterally on each

1 side by either older alluvial deposits or basement complex. That  
2 said older alluvial deposits and basement complex are of con-  
3 siderably more compacted material and are less permeable than  
4 the younger alluvial deposits. That the older alluvial deposits  
5 and basement complex because of their more compacted characteristics  
6 and limited permeability substantially impede the ground waters  
7 which are contained within the younger alluvial deposits from  
8 moving into the older alluvial deposits and basement complex.  
9 That under natural conditions the ground waters contained in  
10 the younger alluvial deposits within the Aguanga Ground Water  
11 Area move in a general westerly direction, i.e. in the same  
12 direction as the surface flow of Wilson and Temecula Creeks.

13 4.

14 That the ground waters within the older alluvial deposits  
15 in the Aguanga Ground Water Area are in hydrologic continuity with  
16 the ground waters in the younger alluvial deposits and said  
17 ground waters add to, contribute to and support the ground waters  
18 contained within the younger alluvial deposits and the surface  
19 flow of Wilson and Temecula Creeks within the Aguanga Ground  
20 Water Area.

21 5.

22 That the said areas of older alluvial deposits and  
23 basement complex which lie beneath and on either side of the  
24 areas of younger alluvial deposits are, as found hereinabove,  
25 composed of considerably more compacted materials than the  
26 younger alluvial deposits and do in fact form the beds and banks  
27 of an underground stream and the ground waters contained in the  
28 younger alluvial deposits move in a westerly direction within  
29 said bed and banks and said older alluvial deposits and basement  
30 complex serve the same purpose as a semi-permeable bed and bank  
31 of a surface stream channel.

6.

That on occasions during or immediately after periods of precipitation, Wilson and Temecula Creeks flow as continual surface streams. That during such times as there is a surface flow of Wilson and Temecula Creeks the ground waters within the younger alluvial deposits over which said creeks flow are connected with said surface flows and when in fact there is not a perennial flow of Wilson and Temecula Creeks, i.e. during periods other than periods of precipitation, those waters which flow on the surface for a short distance disappear underground, then rise to the surface and again disappear, are in fact the ground waters within the younger alluvial deposits.

7.

That the ground waters contained within the younger alluvial deposits over which Wilson and Temecula Creeks flow move in the identical direction of the surface flow of Wilson and Temecula Creeks when in fact they physically flow, are in a known and definite channel, to wit, the area of younger alluvial deposits and are in fact a part of Wilson and Temecula Creeks and said ground waters within said younger alluvial deposits and said surface flows of Wilson and Temecula Creeks as may physically exist do constitute single streams herein referred to as Wilson and Temecula Creeks, respectively.

8.

That while it is known and certain and definite that said younger alluvial deposits rest upon older alluvial deposits or basement complex, the exact extent of the depth of said younger alluvial deposits to contact with said older alluvial deposits or basement complex is not in most areas of the Aguanga Ground Water Area subject to exact ascertainment. That it is impossible, based on the evidence available today, to enter a

1 finding determining the depth of the younger alluvial deposits  
2 throughout said Aguanga Ground Water Area with exactness, but  
3 as this Court will keep continuing jurisdiction of this cause,  
4 jurisdiction is reserved to determine such a fact in the event  
5 it becomes necessary to do so in any particular factual situa-  
6 tion which might arise in the future.

7 9.

8 That although the contact lines on the surface between  
9 the younger and older alluvial deposits and the basement complex  
10 throughout the Aguanga Ground Water Area have not been deter-  
11 mined with absolute exactness, the determination of such contact  
12 lines was sufficient for the United States of America to prepare  
13 maps and exhibits showing said contact lines and said contact  
14 lines as established by said maps and exhibits prepared by the  
15 United States of America have been accepted by this Court as  
16 being the contact lines between younger alluvial deposits,  
17 older alluvial deposits and basement complex on ground surface.

18 10.

19 That attached hereto marked Exhibit B and incorporated  
20 herein is a master alphabetical index of the apparent  
21 owners of all parcels of land within the Aguanga Ground Water  
22 Area together with the parcel numbers of the lands owned by the  
23 respective parties, the exhibits in which these parcels are  
24 listed and the page number in Exhibit C where the legal  
25 description of the respective parcels may be found. That  
26 attached hereto marked Exhibit C and incorporated herein  
27 is a tabulation setting forth among other things specific legal  
28 descriptions of all lands within the Aguanga Ground Water Area.

29 11.

30 That hereinafter a reference to the term "parcel  
31 number" is explained as follows:

-5-

3176

1 thereto, but are in fact vagrant, local, percolating waters.

2 15.

3 That ground waters contained within the Aguanga  
4 Ground Water Area do not stand at or about the same level. That  
5 ground water levels within the areas of older alluvial deposits  
6 and older and younger alluvial deposits may vary considerably.  
7 That movement of the ground water in the older alluvial deposits  
8 in the Aguanga Ground Water Area is not consistent and continuous  
9 but is influenced by many factors including but not limited to  
10 the degree of permeability of the deposits within said areas of  
11 older alluvial deposits, by the probability of physical ground  
12 water barriers beneath the surface and by pumping within said  
13 area. Although in some limited areas the movement of said  
14 ground waters can be and has been definitely determined, there  
15 is insufficient evidence to show to what extent said movement  
16 in the major portion of the older alluvial deposits within the  
17 Aguanga Ground Water Area is affected by such underground or  
18 subterranean conditions.

19 16.

20 That the pumping of the ground waters from the older  
21 alluvial deposits within the Aguanga Ground Water Area does  
22 affect to a presently undetermined extent the surface and  
23 underground flow of Wilson and Temecula Creeks and tributaries  
24 thereto.

25 17.

26 That the general source of the ground waters contained  
27 within the younger and older alluvial deposits in said Aguanga  
28 Ground Water Area is surface flow of Wilson and Temecula Creeks,  
29 runoff from drainage areas outside of that ground water area  
30 which occurs during or immediately after periods of precipita-  
31 tion, and to a lesser degree precipitation upon said Aguanga  
Ground Water Area.

18.

That specifically the source of recharge for the ground waters heretofore found to constitute a part of Wilson Creek or tributaries thereto within the Aguanga Ground Water Area and the ground waters within the older alluvial deposits north of the surface water divide between Wilson and Temecula Creek drainage areas within said ground water area is the surface drainage area of Wilson Creek which is depicted on U. S. Exhibit 277B. That specifically the source of recharge for the ground waters heretofore found to constitute a part of Temecula Creek and tributaries thereto within the Aguanga Ground Water Area and the ground waters within the older alluvial deposits within said ground water area south of the surface water divide between Wilson and Temecula Creeks drainage area is the surface drainage area of Temecula Creek and tributaries thereto as depicted on said U. S. Exhibit 277B.

19.

That all ground waters within the older alluvial deposits within said Aguanga Ground Water Area are in hydrologic continuity with the waters of the Santa Margarita River and its tributaries and do add to and support the Santa Margarita River and tributaries thereto. That in those areas within the Aguanga Ground Water Area where the younger alluvial deposits contact the older alluvial deposits ground waters do percolate in limited amounts into the adjoining younger alluvial deposits. That said ground waters in said older alluvial deposits are not, however, in a known and definite channel.

20.

That all surface waters which flow over and upon the lands within the Aguanga Ground Water Area are a part of the Santa Margarita River stream system.

21.

The surface flow of Wilson and Temecula Creeks within the Aguanga Ground Water Area is intermittent as to both time and place. The following surface diversions from Wilson and Temecula Creeks exist:

- No. 1 - Oviatt, 8S1E 7R on Wilson Creek
- No. 2 - Allen (Star Dust Ranch), 8S1E 9Q on Wilson Creek
- No. 3 - Trunnell, 8S1E 29R on Temecula Creek
- No. 4 - Gibbon & Cottle, 8S1E 29L on Temecula Creek
- No. 5 - Vail Co., 8S1W 10D on Temecula Creek (Vail Dam)

22.

That except as may be expressly found to the contrary in other findings of fact, in this case, all uses of water within said Aguanga Ground Water Area are in their character reasonable and beneficial.

23.

That at the present status of this case, the issue of apportionment has not been presented and this Court has taken no evidence directed to establishing whether such water uses are reasonable or unreasonable as to amount of water used in the light of the rights which may exist as to such water and this issue is left open, is not decided herein and shall be litigated if and when in the future it becomes necessary to do so. At the present status of this case, the evidence is not sufficient to enable this Court to find the total water supply to, the use within, the export from or the net draft upon said Aguanga Ground Water Area or any part thereof or any stream within, either annually or on the average over a period of years.

24.

That on Exhibit C there appear, in addition to the property descriptions certain statements concerned with wells, surface diversions, apparent ownerships, gross acreages, irrigated

1 acreages, irrigable acreages and water duty. The factual state-  
2 ments contained in said Exhibit C which pertain to wells and  
3 surface diversions are true as of the date of this Interlocutory  
4 Judgment.

5 The factual statements contained in said Exhibit which  
6 pertain to apparent ownerships are set forth for convenience only  
7 and are not necessarily correct and are not intended to be  
8 probative on the issue of ownership of any real property described  
9 in said exhibits.

10 The factual statements contained in said exhibits  
11 which pertain to gross acreages, irrigable acreages, irrigated  
12 acreages and water duty shall be prima facie evidence as to such  
13 factors in any subsequent proceeding before this Court in this  
14 cause. As used herein, prima facie evidence is that which  
15 shall suffice for the proof of a particular fact until con-  
16 tradicted or overcome by other evidence.

17 25.

18 That within said Aguanga Ground Water Area as depicted  
19 on U. S. Exhibit 277B and U. S. Exhibit 275 there are numerous  
20 small gullies or creeks or watercourses most of which are unnamed  
21 which are tributary to either Wilson or Temecula Creeks and  
22 which these findings have not considered in detail. That in all  
23 such situations surface flow would occur only during or imme-  
24 diately after periods of precipitation. That underlying many  
25 of such creeks, gullies or watercourses there are younger alluvial  
26 deposits which are bedded upon and laterally confined by older  
27 alluvial deposits or basement complex; that said younger allu-  
28 vial deposits are not extensive but are shallow and ground waters  
29 contained therein would be of a relatively limited quantity.  
30 That said younger alluvial deposits which underlie such creeks,  
31 gullies or watercourses can be determined by reference to

1 U. S. Exhibit 277B and U. S. Exhibit 275. That the older alluvial  
2 deposits or basement complex do in fact form a bed and bank and  
3 impede the vertical and horizontal movement of the ground  
4 waters contained within said younger alluvial deposits. That the  
5 ground waters contained within said younger alluvial deposits  
6 move in the same direction as the surface flow of water when in  
7 fact surface flow exists; that when surface flow exists, the  
8 ground waters within said younger alluvial deposits are in contact  
9 therewith and said ground waters are in fact during such times  
10 and at all other times an integral part of the particular creek,  
11 gully or watercourse.

12 That ground waters contained within such younger allu-  
13 vial deposits are in fact in a known and definite channel, to wit,  
14 the area of younger alluvial deposits and do constitute the  
15 underground flow of the particular creek, gully or watercourse  
16 which traverses over the specific younger alluvial deposits  
17 and said ground waters are a part of the Santa Margarita River  
18 stream system.

19 26.

20 That the surface and ground waters contained within  
21 the younger alluvial deposits referred to in Finding 25 above do  
22 not warrant in these Findings of Fact specific detailed exhibits  
23 setting forth descriptions of the lands which abut upon or  
24 are traversed by the surface or underground flow of each creek,  
25 gully, or watercourse. That no party to this cause has requested  
26 specific findings on these small creeks, gullies or watercourses  
27 and this Court at this time makes no specific finding thereon.  
28 That as these findings and judgments are interlocutory, this  
29 Court will make specific findings should any party to this cause  
30 request this Court to do so. That in the event no such request  
31 is made, this Court can and will if the occasion should arise in

1 the future be able to make such determinations as may be  
2 necessary from the facts as they exist and as found in Finding  
3 25 above.

4 27.

5 That no diversion or use of either surface or ground  
6 waters within the Aguanga Ground Water Area has been open,  
7 notorious, adverse or hostile to any party in this cause and no  
8 prescriptive right to the use of surface or ground waters from  
9 any diversion or extraction within the Aguanga Ground Water  
10 Area exists.

11 28.

12 That on certain of the exhibits attached to these  
13 findings of fact there appear factual statements concerning  
14 applications to appropriate specified waters of the Santa Mar-  
15 garita River stream system within the Aguanga Ground Water Area.  
16 That because said applications to appropriate said waters involve  
17 relatively small amounts of water, this Court has not generally  
18 made specific findings on each of these applications nor has any  
19 party requested that such findings be made. This court finds  
20 that such factual statements are true and that the applicant to  
21 appropriate said waters as appears on said exhibits has such  
22 water right as such stated facts warrant under and pursuant to  
23 the laws of the State of California concerned with the appropria-  
24 tion of waters. Jurisdiction is reserved to enter specific  
25 findings of fact and judgment provisions concerning said appro-  
26 priative rights either prior or subsequent to the entry of final  
27 judgment in this cause should any party so request.

28 That in other Findings of Fact, Conclusions of Law  
29 and Interlocutory Judgments in this cause certain parties have  
30 been adjudged to have appropriative rights to the use of the  
31 waters of the Santa Margarita River and/or its tributaries.

12

1 That except as to those appropriative rights as exist from the  
2 factual statements which appear on certain exhibits attached to  
3 these Findings of Fact and other appropriative rights speci-  
4 fically adjudged by other Findings of Fact and Interlocutory  
5 Judgments in this cause, there are no appropriative rights  
6 to the use of the surface waters which flow over and upon any  
7 of the lands contained within the Aguanga Ground Water Area or  
8 ground waters contained within the younger or older alluvial  
9 deposits within said ground water area.

10 29.

11 That in Findings of Fact and Interlocutory Judgments  
12 Nos. 33 and 34 this Court adjudged rights to the waters of  
13 Wilson Creek and Temecula Creek upstream from the Aguanga Ground  
14 Water Area.

15 30.

16 That this Court has heretofore entered Interlocutory  
17 Judgment No. 27 concerning lands apparently owned by defendants  
18 Garner L. Knox, Flora S. Knox and Walter G. Knox which are  
19 located in Aguanga Valley within the Aguanga Ground Water Area.  
20 That Findings of Fact, Conclusions of Law and Interlocutory  
21 Judgment No. 27 are incorporated herein by reference.

22 31.

23 That this Court has heretofore entered Interlocutory  
24 Judgment No. 26 concerning lands apparently owned by defendant  
25 James Oviatt. That some of the lands considered in said  
26 Interlocutory Judgment No. 26 are located within the Aguanga  
27 Ground Water Area. That those provisions of Findings of Fact,  
28 Conclusions of Law and Interlocutory Judgment No. 26 which  
29 pertain to lands within the Aguanga Ground Water Area are in-  
30 corporated herein by reference.

That this Court will hereinafter enter Findings of Fact, Conclusions of Law and Interlocutory Judgment No. 43 concerning lands apparently owned by defendants Katharine C. Gibbon and William W. Cottle. That said lands which will be covered by Interlocutory Judgment No. 43 are within the Aguanga Ground Water Area and this Court will incorporate herein by reference Findings of Fact, Conclusions of Law and Interlocutory Judgment No. 43 when entered.

33.

That the lands within the Aguanga Ground Water Area apparently owned by defendants Garner L. Knox, Flora S. Knox and Walter G. Knox, James Oviatt, Katharine C. Gibbon and William W. Cottle are referred to in Exhibit B and specifically described in Exhibit C, said Exhibits having heretofore been incorporated into these Findings of Fact.

CONCLUSIONS OF LAW

1.

That all ground waters found within the basement complex within the Aguanga Ground Water Area do not add to, support nor contribute to the Santa Margarita River and are local, vagrant, percolating waters not a part of the River or any tributary thereto.

2.

That all surface waters which flow over and upon the lands within the Aguanga Ground Water Area are a part of the Santa Margarita River and the use of said waters is subject to the continuing jurisdiction of this Court.

3.

That all lands listed by parcel number in Exhibit D and described in Exhibit C which exhibits are attached hereto

1 and incorporated herein, have a correlative, riparian right to  
2 the use of the surface and underground flow of Wilson Creek.

3 4.

4 That all lands listed by parcel number in Exhibit E  
5 and described in Exhibit C which exhibits are attached hereto  
6 and incorporated herein, have a correlative riparian right to  
7 the use of the waters of Temecula Creek.

8 5.

9 That the exercise of the riparian rights to the use  
10 of waters of Wilson Creek and Temecula Creek is subject to the  
11 continuing jurisdiction of this Court; that all uses of the  
12 waters of said creeks and their tributaries are subject to the  
13 continuing jurisdiction of this Court.

14 6.

15 That all lands described in Exhibit C, attached hereto  
16 and incorporated herein, have a correlative, overlying right  
17 to the use of the ground waters contained within the older allu-  
18 vial deposits which underlie said lands. That all of said ground  
19 waters within said older alluvial deposits within the Aguanga  
20 Ground Water Area add to, contribute to and support the Santa  
21 Margarita River and/or its tributaries and the use of said  
22 waters is subject to the continuing jurisdiction of this Court.

23 7.

24 That each smallest tract of land held under one chain  
25 of title a part of which abuts upon or is traversed by any  
26 area containing younger alluvial deposits within said Aguanga  
27 Ground Water Area has a correlative, riparian right to the use  
28 of said ground waters within and surface waters which may flow  
29 upon said younger alluvial deposits, and the use of such waters  
30 shall be and is subject to the continuing jurisdiction of this  
31 Court. That except as to Wilson Creek and Temecula Creek such

1 lands have not been specifically described in these findings  
2 but can be readily ascertained in the future should it be  
3 necessary to do so by reference to the area of younger alluvial  
4 deposits within said Aguanga Ground Water Area as depicted on  
5 U. S. Exhibits 277Band 275.

6 8.

7 That no prescriptive rights to the use of the surface  
8 or underground flow of Wilson and Temecula Creeks or their  
9 tributaries within the Aguanga Ground Water Area or to any  
10 ground waters contained within the younger or older alluvial  
11 deposits within said ground water area exist.

12 9.

13 That except as provided by Finding of Fact 28 herein  
14 there are no appropriative rights to the use of the surface  
15 waters which flow over and upon any of the lands contained  
16 within the Aguanga Ground Water Area or to ground waters con-  
17 tained within the younger or older alluvial deposits within  
18 said ground water area.

19  
20 INTERLOCUTORY JUDGMENT

21 1.

22 IT IS HEREBY ORDERED, ADJUDGED AND DECREED that all  
23 ground waters contained within deposits of basement complex as  
24 said deposits are depicted on U. S. Exhibit 275 and within the  
25 Aguanga Ground Water Area are vagrant, local, percolating waters  
26 which do not add to, support nor contribute to the Santa Mar-  
27 garita River or its tributaries.

28 2.

29 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
30 rights of the owners of the said lands referred to in paragraph  
31 one of this Interlocutory Judgment and their heirs, successors

1 and assigns, to the use of the ground waters are forever quieted  
2 in them and against the United States of America and all other  
3 parties having rights to the use of the waters of the Santa  
4 Margarita River or its tributaries, their heirs, successors  
5 and assigns.

6 3.

7 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
8 owners of said lands referred to in paragraph one of this Inter-  
9 locutory Judgment, their heirs, successors and assigns, are  
10 forever restrained from asserting rights in or to the waters  
11 of the Santa Margarita River or its tributaries or waters which  
12 add to and support said River or its tributaries, excepting  
13 rights to surface waters which flow over and upon said lands.

14 4.

15 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
16 rights inter se of the owners of said lands referred to in  
17 paragraph one of this Interlocutory Judgment to the use of the  
18 underlying vagrant, local, percolating waters have not been  
19 adjudged, determined nor decreed in these proceedings.

20 5.

21 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all  
22 surface waters which flow over and upon any lands within the  
23 Aguanga Ground Water Area as depicted on U. S. Exhibit 277B and  
24 described in Exhibit C are a part of the Santa Margarita River  
25 and their use subject to the continuing jurisdiction of this  
26 Court.

27 6.

28 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all  
29 lands listed by parcel number in Exhibit D and described in  
30 Exhibit C which exhibits are attached hereto and incorporated  
31 herein, have a correlative, riparian right to the use of the

1 use of the surface and underground flow of Wilson Creek.

2 7.

3 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all  
4 lands listed by parcel number in Exhibit E and described in  
5 Exhibit G which exhibits are attached hereto and incorporated  
6 herein, have a correlative, riparian right to the use of the  
7 surface and underground flow of Temecula Creek.

8 8.

9 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that all  
10 lands described in Exhibit C attached hereto and incorporated  
11 herein, have a correlative, overlying right to the use of the  
12 ground waters contained within the older alluvial deposits  
13 which underlie said lands. It is further ordered, adjudged and  
14 decreed that the use of the ground waters contained within said  
15 older alluvial deposits is subject to the continuing jurisdiction  
16 of this Court. It is further ordered, adjudged and decreed  
17 that said ground waters contained within said older alluvial  
18 deposits within the Aguanga Ground Water Area contribute to and  
19 support the Santa Margarita River and/or its tributaries, but  
20 that said waters are percolating waters and not in a known and  
21 definite channel.

22 9.

23 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
24 owners of the smallest tract of land held under one chain of  
25 title a part of which abuts upon or is traversed by younger  
26 alluvial deposits not heretofore specifically determined to be  
27 riparian to a specific creek within said Aguanga Ground Water  
28 Area have correlative, riparian rights to the use of said waters  
29 contained within said younger alluvial deposits and such surface  
30 flow as traverses over and upon said younger alluvial deposits.  
31 It is further ordered, adjudged and decreed that the use of said

1 waters is subject to the continuing jurisdiction of this Court  
2 and that this Court shall maintain jurisdiction to make such  
3 findings in the future as may be necessary to settle any dispute  
4 concerning the propriety of the use of said waters and that this  
5 Court shall in the future refer to U. S. Exhibits 277B and 275  
6 to determine the location of said younger alluvial deposits  
7 within said groundwater area.

8 10.

9 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
10 exercise of the correlative riparian rights to the use of the  
11 waters of Wilson and Temecula Creeks and to the use of the  
12 waters as provided by Paragraph No. 9 of this Interlocutory  
13 Judgment and all other uses of such waters shall be and are sub-  
14 ject to the continuing jurisdiction of this Court.

15 11.

16 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that the  
17 issue of apportionment has not been presented and this Court has  
18 taken no evidence directed to establishing whether the use of any  
19 waters herein adjudged to be subject to the continuing juris-  
20 diction of this Court are reasonable or unreasonable as to  
21 amount of water used in the light of correlative rights which may  
22 exist as to such waters and this issue is left open, is not  
23 decided herein and shall be litigated by this Court if and when  
24 in the future it becomes necessary to do so.

25 12.

26 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that  
27 there are no prescriptive rights to use any of the waters con-  
28 tained in the younger or older alluvial deposits within the  
29 Aguanga Ground Water Area or surface waters which flow over and  
30 upon any of the lands within the Aguanga Ground Water Area.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that except as may be provided in factual statements set forth on the exhibits attached to this Interlocutory Judgment or specifically adjudged in other Findings of Fact and Interlocutory Judgments in this cause, there are no appropriative rights to the use of the ground waters contained within the younger or older alluvial deposits within the Aguanga Ground Water Area or the surface waters which flow over and upon any lands within said Aguanga Ground Water Area.

14.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that this Interlocutory Judgment and the Findings of Fact, Conclusions of Law attached hereto pertain only to the rights to the use of waters on lands within the Aguanga Ground Water Area.

15.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that Findings of Fact, Conclusions of Law and Interlocutory Judgment No. 27 are incorporated herein by reference. It is further ordered, adjudged and decreed that those provisions of Findings of Fact, Conclusions of Law and Interlocutory Judgment No. 26 concerned with lands within the Aguanga Ground Water Area are incorporated herein by reference; it is further ordered, adjudged and decreed that this Court retains jurisdiction to incorporate herein by reference Findings of Fact, Conclusions of Law and Interlocutory Judgment No. 43 when entered.

16.

IT IS FURTHER ORDERED, ADJUDGED AND DECREED that based upon the decision of the United States Court of Appeals for the Ninth Circuit, California v. United States, 235 F.2d 647, that this is not a final decree but is interlocutory in character

1 and by reason of the Order of this Court that all parties are  
2 adverse one to the other, thus dispensing with cross pleadings,  
3 all parties to this proceeding may object to these Findings of  
4 Fact, Conclusions of Law and Interlocutory Judgment and will be  
5 given full opportunity upon due notice to interpose their ob-  
6 jections to these Findings of Fact, Conclusions of Law and  
7 Interlocutory Judgment prior to the entry of final judgment in  
8 this cause.

9 17.

10 IT IS FURTHER ORDERED, ADJUDGED AND DECREED that this  
11 Interlocutory Judgment is not appealable, is not final and shall  
12 not be operative until made a part of the final judgment and  
13 this Court expressly reserves jurisdiction to modify or vacate it  
14 either upon its own motion or upon motion of any party to this  
15 proceeding until such time as final judgment in this cause is  
16 entered.
