

- EXPLANATION**
- Qyal Younger alluvium
 - Qtoal Older continental deposits
 - bc Basement complex
 - Fault
Dashed where position is inferred, dotted where concealed
 - O_H Well
Domestic, stock, or unused
 - O_A Well
Irrigation use with pump of 5 horsepower or more
 - O_B Well
Formerly flowing
 - O_C Well
Dry or destroyed
 - O Spring
Flowing in 1960
 - O Spring
Formerly flowing
- Letter and digit at well indicates location. Other number at well or spring is altitude of water surface in 1960. Number in parentheses is year of measurement if other than 1960

Water-level contour, spring 1960
Dashed where control is imperfect.
Arrow indicates direction of ground-water movement. Contour interval is 25 and 100 feet. Datum is mean sea level

MAP OF LANCASTER, NIGGER, RAED, AGUANGA, AND WILSON VALLEYS
Showing geology, location of wells and springs, and water-level contours for spring, 1960

Case No. 1247-SD
USA vs. Fuller
